

WAAVP AF Award 2021

Khalid M. Mohammedslih

Date: 3 Nov 2021

Name	Khalid Mohammednour Mohammedslih
Degree	PhD in Veterinary Pharmacology
Current position	Assistant Professor of Veterinary Pharmacology
Department	Clinical Studies
Faculty	Faculty of Veterinary Science
Organization	University of Nyala
Full address	Department of Clinical Studies, Faculty of Veterinary Science, University of Nyala, Nyala, South Darfur State, Sudan
Contact information	Email: marajan83@yahoo.com Tel: 0024911594886

Short report:

The WAAVP annual conferences is a good chance for researchers to enhance their capacity in the context of Veterinary Parasitology. The 28th International Conference of WAAVP, Dublin, Ireland, was very interesting 5 working days. The conference was virtual, but the loop made the dialog and the interaction very easy and fruitful. During the conference, I was introduced myself and discussed to several scientists as well as graduate students from different regions with different research areas. I was attended presentations with new ideas using new techniques and introduced new research findings. However, the obtained knowledge from the attended presentations, posters and what we discussed will enhance our running projects.

The WAAVP AF award provided me a chance to introduce for the first time that ivermectin was not fully effective against *Haemonchus contortus* in small ruminants in South Darfur State, and consequently the development of ivermectin resistance in Sudan.
